#### UNITED STATES SECURITIES AND EXCHANGE COMMISSION WASHINGTON, D.C. 20549

#### FORM 8-K

CURRENT REPORT

Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of report (Date of earliest event reported): March 20, 2023

#### **Catalyst Biosciences, Inc.**

(Exact Name of Registrant as Specified in Charter)

000-51173 (Commission File Number)

Registrant's telephone number, including area code: (650) 871-0761 Not Applicable (Former Name or Former Address, if Changed Since Last Report) 56-2020050 (IRS Employer Identification No.)

611 Gateway Blvd Suite 120 South San Francisco, CA

South San Francisco, CA (Address of Principal Executive Offices)

94080 (Zip Code)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

□ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

Delaware

(State or Other Jurisdiction of Incorporation)

Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

D Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

□ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

		Name of each exchange on which
Title of each class	Trading Symbol(s)	registered
Common Stock	CBIO	The Nasdaq Capital Market

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company  $\Box$ 

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

#### Item 7.01 Regulation FD Disclosure.

On March 20, 2023, Dr. Nassim Usman, on behalf of Catalyst Biosciences, Inc. (the "Company"), gave a presentation (the "Corporate Presentation"). In addition, the Company posted the Corporate Presentation on its website, ir.catalystbiosciences.com. A copy of the Corporate Presentation is attached hereto as Exhibit 99.1.

The information in this Item 7.01 of this Current Report on Form 8-K (including Exhibit 99.1) is being furnished and shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to the liabilities of that section. The information in this Current Report shall not be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such a filing.

## **Cautionary Note Regarding Forward-Look**

This presentation contains "forward-looking statements" within the meaning statements involve substantial risks and uncertainties and are based on estin statements of historical facts, all statements included in this presentation are without limitation, the amount and timing of planned cash distributions under the ("CVR"); expectations regarding the proposed transactions with entities a Beijing Continent Pharmaceuticals Co. Ltd. ("Beijing Continent"), the expecte the proposed transaction; the potential market opportunity for and expected nonalcoholic steatohepatitis ("NASH") and liver fibrosis; the safety and tolera association of clinical data with potential clinical benefit; and statements rega regarding, Beijing Continent's programs. In some cases, you can identify for as "anticipate," "design," "expect," "potential," "plan," or the negative of these intended to identify forward-looking statements. Actual results or events coul intentions, expectations, and projections disclosed in the forward-looking sta cause actual results or events to differ materially, including, but not limited to combination with Beijing Continent will not be completed in a timely manner, Hydronidone (F351) in NASH and liver fibrosis will not be successful or requ that results from the Phase 2 trial of Hydronidone (F351) in hepatitis related subsequent trials, and other risks described in the "Risk Factors" section of t Report on Form 10-K and Quarterly Reports on Form 10-Q filed with the Sec ("SEC") as well as the proxy statement and registration statement on Form 5 We disclaim any obligation to update any forward-looking statements, exception

## **CBIO corporate strategy**

### **Generate further value for stockholders**

### December 2022

- Acquired global rights (excluding China) to Hydronic treat NASH and liver fibrosis
- Plan to acquire a controlling interest in Beijing Conti biopharmaceutical company based in China, from the parties
- + Announced \$7.5 million special dividend and CVR

### 2023

- + Completed \$6 million asset sale of compounds designation disorders to GC Biopharma, with net proceeds to be
- + Annual Meeting of Stockholders expected to be held

## CBIO 2023 corporate strategy Transition Our Focus to Organ Fibrosis

- + Expect to consummate Beijing Continent business cc
- + Planning development of Hydronidone (F351) for NA
- + Beijing Continent expected to complete enrollment of (F351) for hepatitis B virus ("HBV")-associated liver fi
- + Distribute remaining net cash from legacy assets to C

## Beijing Continent sales of ETUARY (Pirfer Consistent growth in revenue & profit

#### **Beijing Continent Financials**

### **Catalyst Biosciences**

### Liver fibrosis market opportunity

## Hydronidone's metabolic profile vs Pirfeni

**Hydron** 

- Low potential of Hydronidone and its major metabolites for DDIs in te CYP450, and major transporter systems
- + In contrast to Pirfenidone, the shift toward Phase II metabolism may formation of reactive metabolites and covalent protein binding, thus i idiosyncratic liver toxicity (*Zhou S et al, J Med Chem 2020*)

## Hydronidone's (F351) positive nonclinical Therapeutic effect & favorable safety profile in liver

- + Has shown anti-fibrotic effects across standard models of liv
  - More potent than Pirfenidone
- + Pleiotropic mechanism of action designed to target the key (
  - Independent of initial causative insult
  - Results in inhibition of hematopoietic stem cell proliferation with
- + Absorption, distribution, metabolism and excretion profile is bioavailability, exposure and metabolite profile relevant to h
- + No adverse effects on major organ systems observed
- + Well tolerated upon long-term dosing across species at exp major organ toxicity
- + No genotoxicity or adverse effects on fertility and reproducti

### Phase 2 trial results in HBV-induced liver 1

Double blind, randomized, placebo-controlled + sta

Design	<ul> <li>A randomized, double-blind, placebo-contro dose-exploration phase 2 trial of Hydronidon treatment of liver fibrosis associated with HE Beijing Continent)</li> </ul>		
Basic Treatment	<ul> <li>*Entecavir administered continuously for 52</li> </ul>		
Primary Endpoint	<ul> <li>Proportion of liver fibrosis Ishak scores decreased</li> <li>52 weeks of treatment</li> </ul>		
Secondary Endpoint	<ul> <li>Conversion rate and decrease of HBV DNA</li> <li>Proportion of decrease in liver transient elas compared to pre-treatment</li> <li>Proportion of liver tissue inflammation gradir treatment compared to pre-treatment withou</li> <li>Improvement of liver function alanine aminor</li> </ul>

## Phase 2 trial results in HBV-induced liver 1 Double blind, randomized, placebo-controlled + ent

© Catalyst Biosciences

Cai et al Clinical Gastroenterology & Hepatol

### Phase 2 trial results in HBV-induced liver 1

### Double blind, randomized, placebo-controlled + ent

### **Therapeutic Effect**

#### **Primary Endpoint:**

The proportion of Ishak of liver fibrosis decreased by ≥1 point (fibrosis regression) from baseline after 52 weeks treatment

P = 0.024

### **Safety Profile**

**Positive safety profile.** There was **no statistical difference** in the occurrence of adverse events, adverse reactions and serious adverse events between the four groups during the trial

© Catalyst Biosciences

Cai et al Clinical Gastroenterology & Hepatol

### Clinical risk/benefit profile of Hydronidone Potential treatment of liver fibrosis of different etiol

- + Positive results in a subpopulation of patients with sig Hydronidone's (F351) potential in preventing progress
- No statistical difference in the occurrence of adverse or serious adverse events between the four groups du
- + Good safety profile demonstrated in subjects with mile
- + No adverse effects nor prolongation of QT interval
- Food consumption slows down absorption of Hydroni metabolites and reduces the Cmax values; therefore, recommended
  - No clinically relevant DDIs observed

### **CBIO Summary** Transitioning Our Focus to Organ Fibrosis

- Acquired global rights (excluding China) to Hydronido treat NASH and liver fibrosis and demonstrating prom
- Anticipate completing a business combination with Be stage biopharmaceutical company based in China in
- + Hydronidone (F351) clinical readouts expected in 202 and NASH
- + Planned additional cash distributions to CVR holders

# Thank you
